

# **Windchill Extension Test Plan**

# Extension Platform Validation Plan

Details					
Generated	2025/01/26 23:35				
Group Id	com.wincomplm				
Artifact Id	wex-platform-testplan-validation				
Name	ame Extension Platform Validation Plan				
Version	2.0				
Beta	No				
Windchill Version	13.0				
Description	The platform within Windchill that manages extensions				
System Extension	Yes				

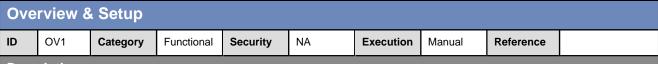

# **Test Definition Index**

Overview & Setup	4
Install test version	5
Set Windchill+ to be default	6
Restart after install of new platform	7
Check the audit WC+ is set to true	8
Check the audit WC+ is not changeable	9
Set Windchill+ to be not be default	10
Restart after reset of variable	11
Create Wex Manager new user	12
Ensure all Extensions are allowed to be installed	13
Manager	14
Check standard user has no access to the extension manager	15
Check wex user has access to the extension manager	16
Check extension manager user can do an install of a signed extension	17
Undeploy an extension	18
Check extension manager user cannot do an install of a snapshot, beta or trial	19
Check extension manager user cannot install unsigned	20
Enable only Windchill+ are allowed to be installed	21
Check extension manager user cannot do an install of a non Windchill+ extension	22
Check extension manager user can do an install of an approved Windchill+ extension	23
Check extension is registered in DB	24
Check the audit show the new extensions	25
Undeploy and check unregistered in DB	26
Sync	27
Turn off Windchill+ only	28
Turn of all syncs	29
Deploy test extension	30
Undeploy the extension	31
Enable an extension to be installed from the DB	32
Check the system detects the record is valid	33
Setup sync from the DB	34
Check the sync diags shows a valid update	35
Turn of all syncs	36
Install the test wex-example-sync	37
Check the sync diags show valid update	38
Setup sync from the resources	39

New resource extension deployed	40
Turn off Resource Sync	41
Undeploy all test Extensions	42
Configuration	43
Install the configuration example	44
Check the security report of the example shows the correct information	45
Check site admin has full access to the configuration	46
Check extension admin has limited access to the configuration	47
Check configuration can be changed	48
Menus	49
Check menu is added on deploy	50
Check menu is removed on undeploy	51
Listeners	52
Install a test listener extension	53
Check the extension shows the configurable interface	54
Fire the listener	55
Alter the execution order	56
Fire the listener	57
Methods	58
Install a test method extension	59
Test method execute via JSP	60
Create a workflow to execute a WexInvoke	61
Initiate a workflow to execute a WexInvoke	62

# Description

Version **2.0.2** 

Windchill Version 13.1

Click the link below to download the latest version of this test plan

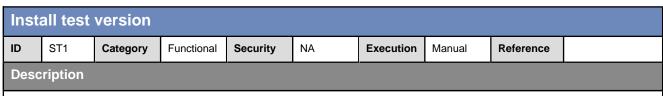

Testing for the new Wincom Extension Platform 2.0 features that will be included in Windchill.

This test plan is functional only and does not test security.

https://github.com/wincomplm/edk/raw/refs/heads/main/access/test-wexes/13.1/wex-platform-testplan-validation.release.testplan.pdf

# Overview & Setup

Windchill will have the latest platform preinstalled but the latest version can be installed using the installer.

## **Actions**

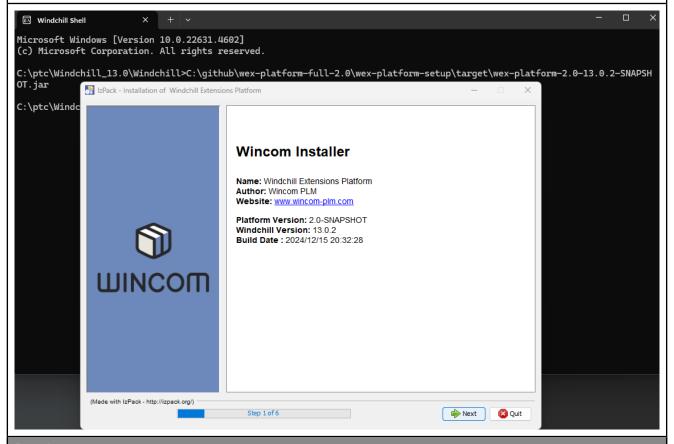

Download the installer and run it from a Windchill Shell

Click the link below to download the latest installer

Windows: java -jar wex-platform-xxxxx.jar Lunix (no GUI): java -jar wex-platform-xxxxx.jar -console

Click the link below to download the latest installer

https://github.com/wincomplm/edk/raw/refs/heads/main/access/test-wexes/13.1/wex-platform-2.0-13.1.0.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.jar/linears/stational-platform-2.0-13.1.0-SNAPSHOT.

# Result

Install complete

#### Set Windchill+ to be default ST11 Category Functional Security NA Execution Manual Reference

# Description

Set the WEX\_WCPLUS environment variable to ensure WC plus is preset

## Actions

Set the WEX\_WCPLUS variable to true

# USERDUMAIN=AZUreAD

USERDOMAIN\_ROAMINGPROFILE=AzureAD

USERNAME=SimonHeath

USERPROFILE=C:\Users\SimonHeath

WEX\_WCPLUS=true

windir=C:\Windows

WT\_HOME=C:\ptc\Windchill\_13.0\Windchill

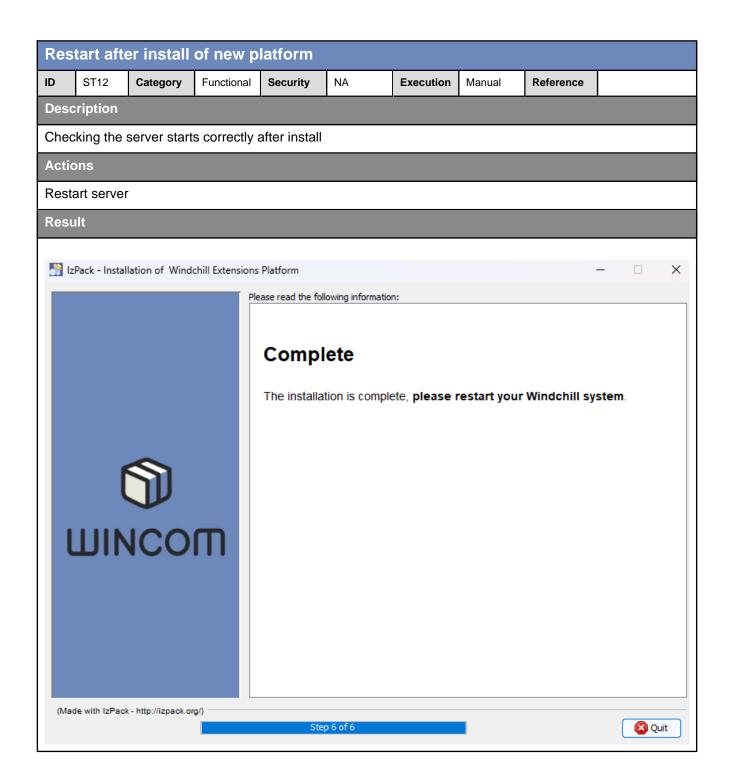

ZES\_ENABLE\_SYSMAN=1

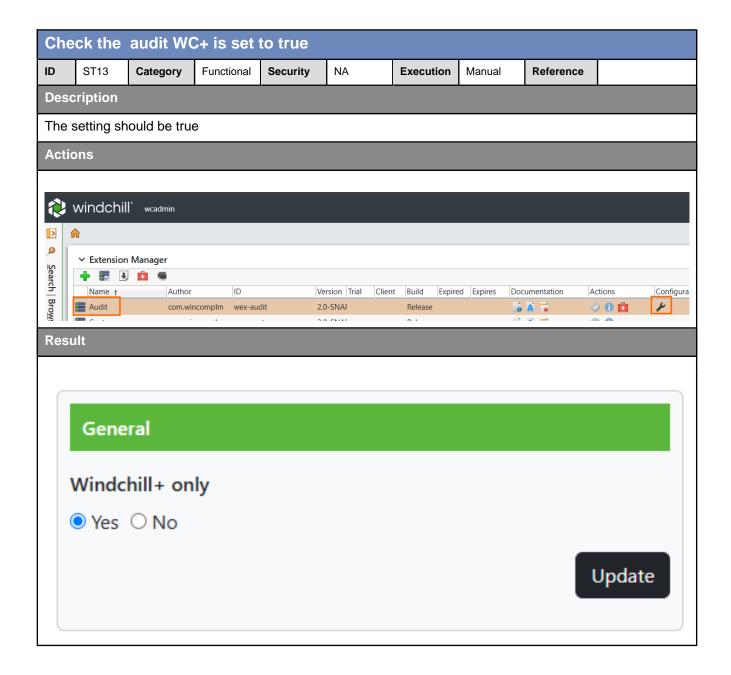

## Result

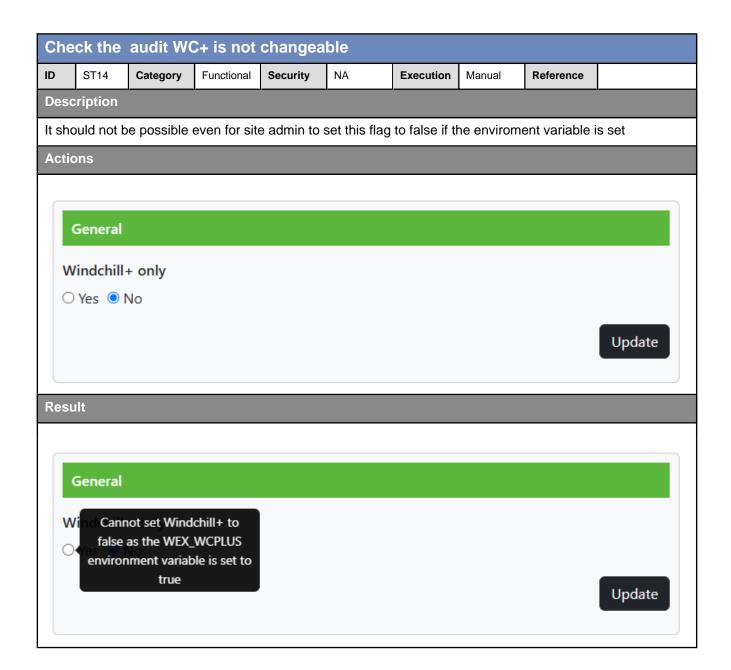

On startup the variable is reported

```
INFO
      : wt.method.server.startup - Creating com.ptc.tomcat.embedded.
INFO : wt.pom.statementCache.summary - StatementCache: wt.util.Cach
INFO : wt.pom.statementCache.summary - StatementCache: wt.util.Cach
     : wt.system.out - Winchill Extensions: WEX WCPLUS set
INFO
     : wt.pom.statementCache.summary - StatementCache: wt.util.Cach
INFO
     : wt.pom.statementCache.summary - StatementCache: wt.util.Cach
INFO
      : com.ptc.netmarkets.util.misc.StandardNmActionService.xmlInit
```

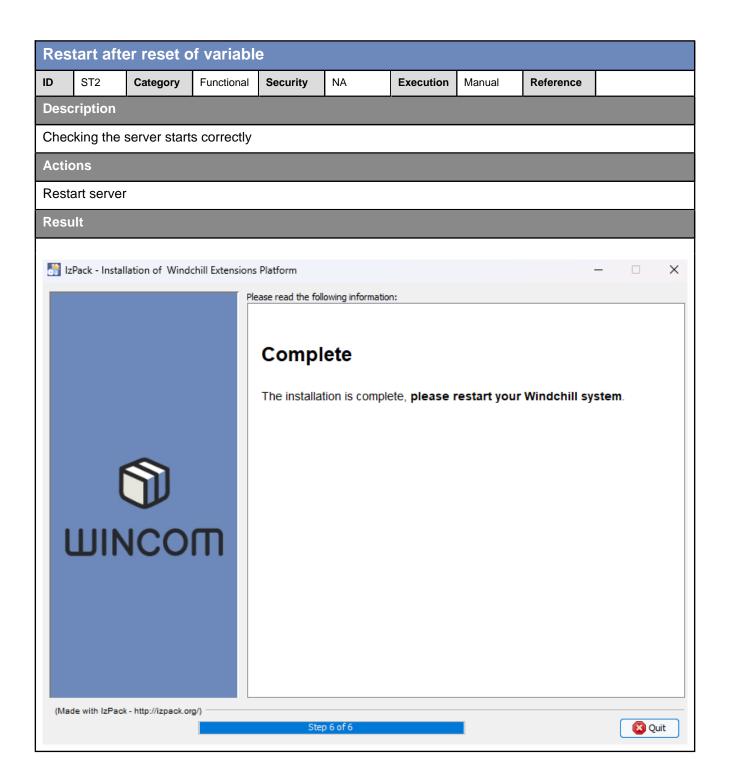

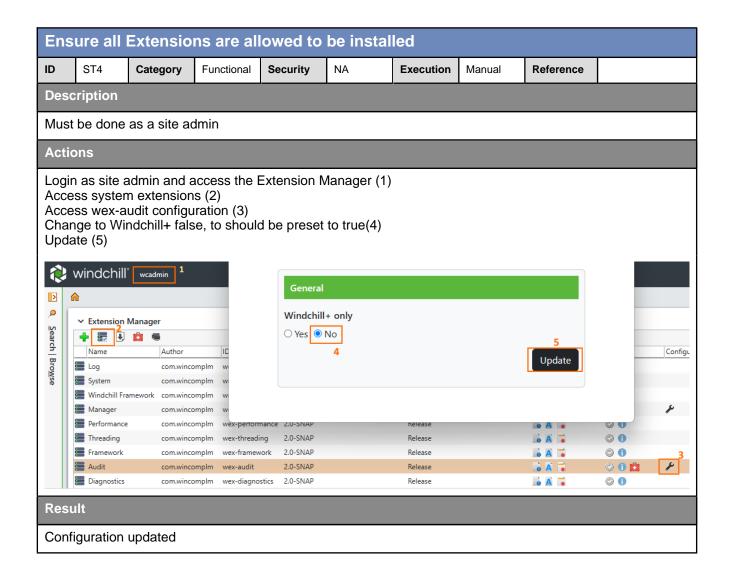

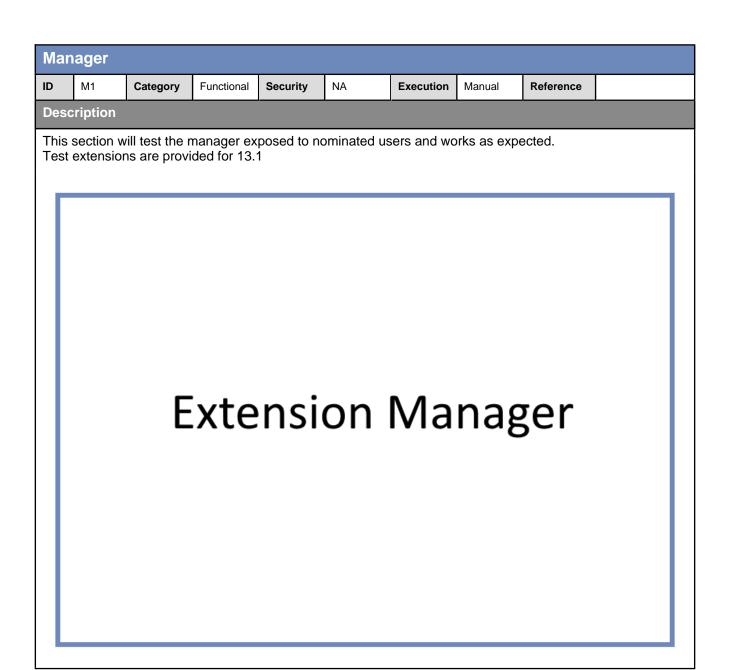

Set Windchill+ to be not be default										
ID	ST15	Category	Functional	Security	NA	Execution	Manual	Reference		
Desc	Description									
Set the WEX_WCPLUS environment to false										
Actions										
Set the WEX_WCPLUS variable to false										
Result										
Check the system settings										

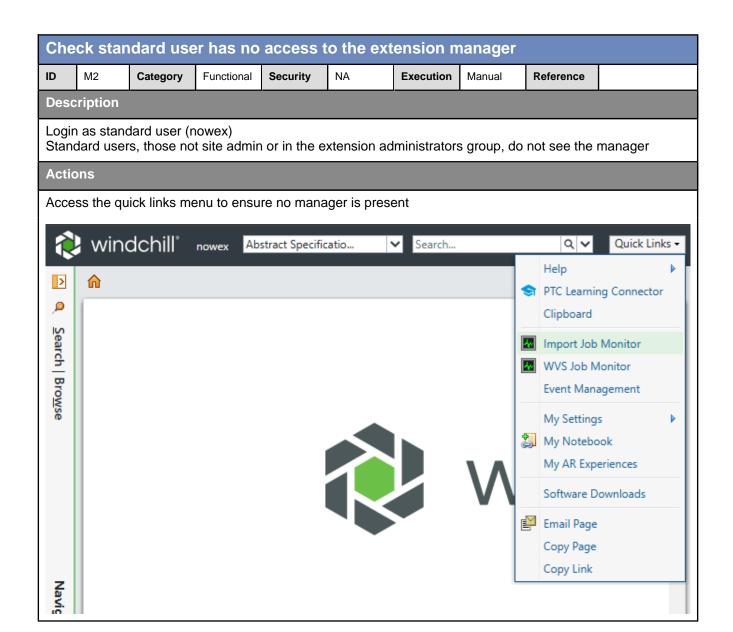

### **Create Wex Manager new user** ST3 Category **Functional** Security NA Execution Manual Reference Description We will use three users during the testing + Site Admin - Will be able to perform all functions including system configuration (wcadmin) + Extension Admin - A user that can deploy and undeploy approved extensions (wex) + Standard User - A user with no special privilages (nowex) **Actions** Create a new user (wex) and add them to this group Create a new user (nowex) and do not add them to this group Result The Group Extension Administrators is present (does not need to be manually created) Q 🗸 windchill\* Abstract Specificatio... ✓ Search. Quick Links • wcadmin **Site** Recently Accessed • > → Participant Administration (2 objects) Search | Browse 🗕 🖀 🦉 强 | Actions 🕶 Q 🖁 + 🕝 Search in table Name Status Description Organization ID **Extension Administrators** Can deploy, undeploy and configure extensions for the business ( 0 objects selected ) Navigator

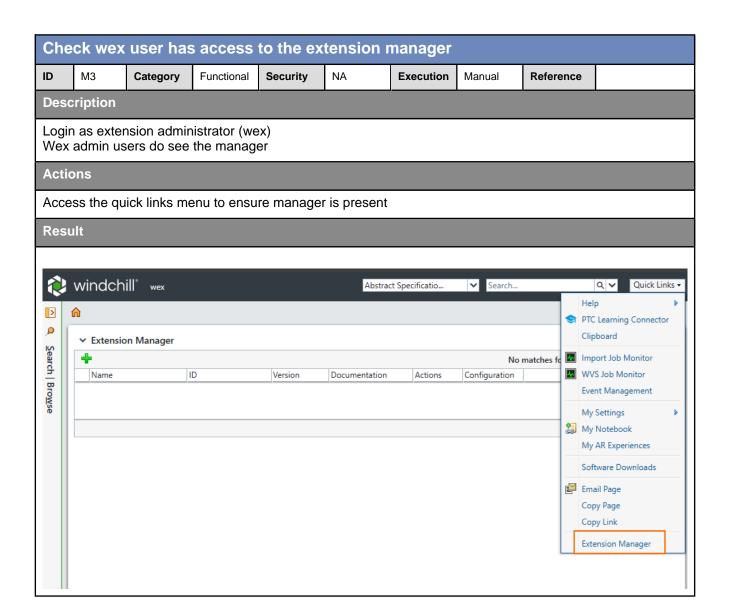

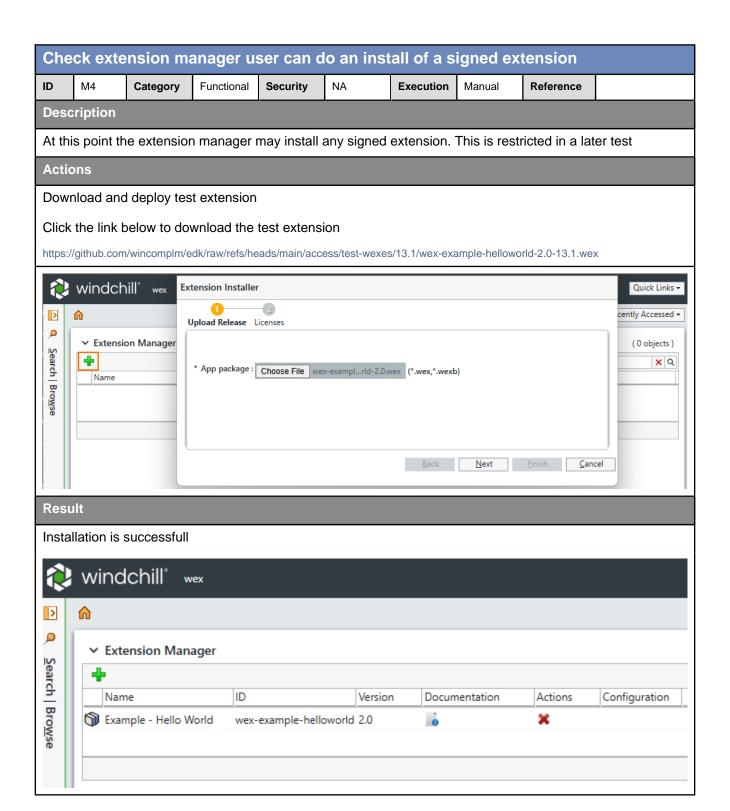

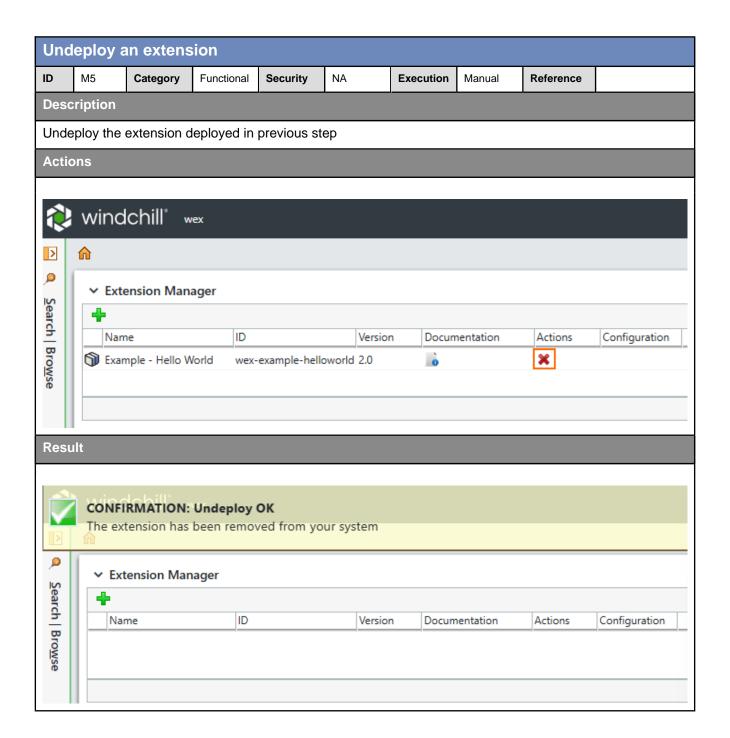

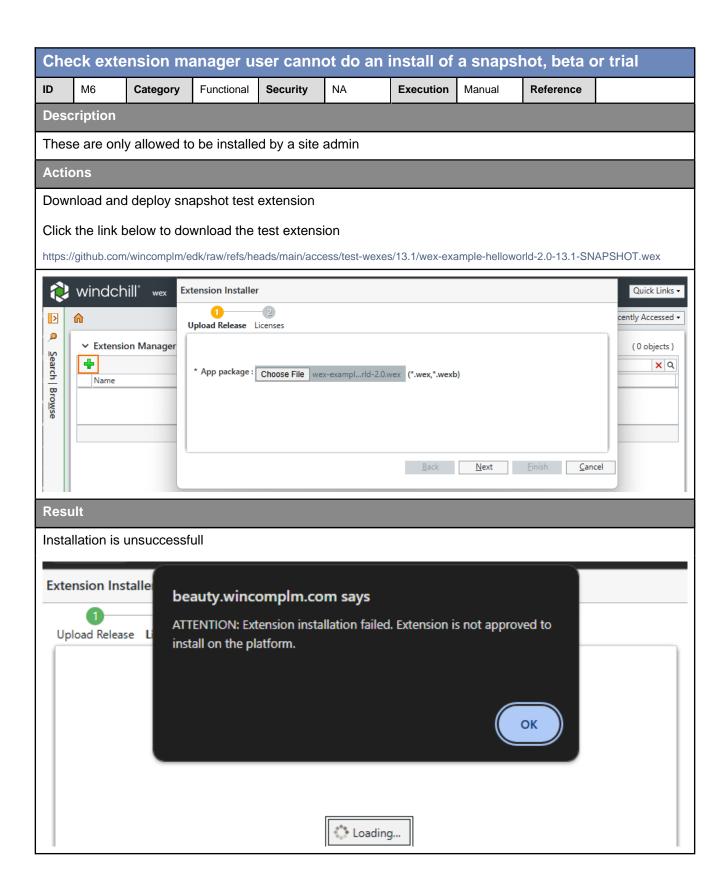

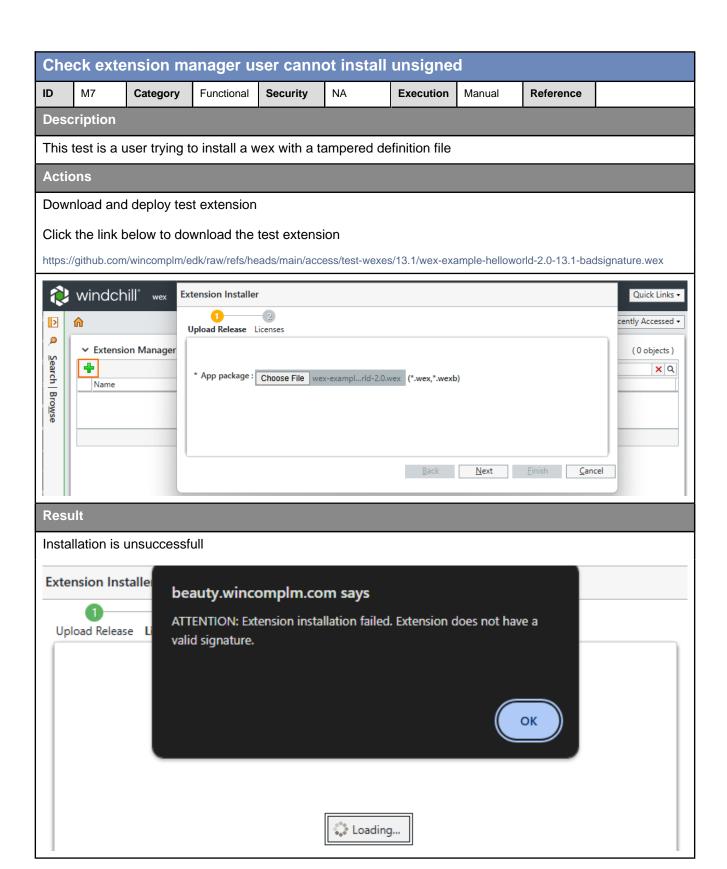

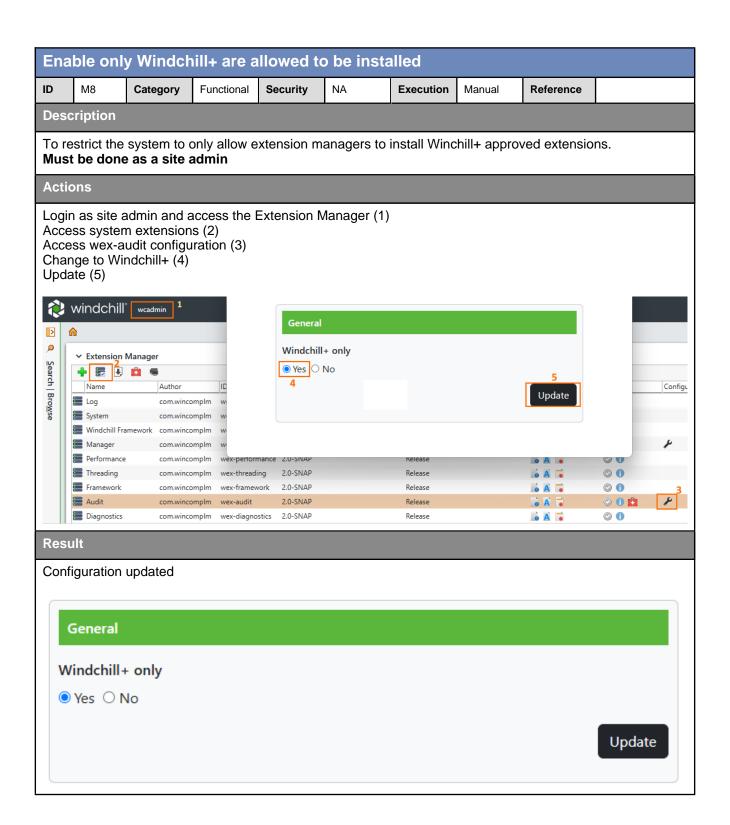

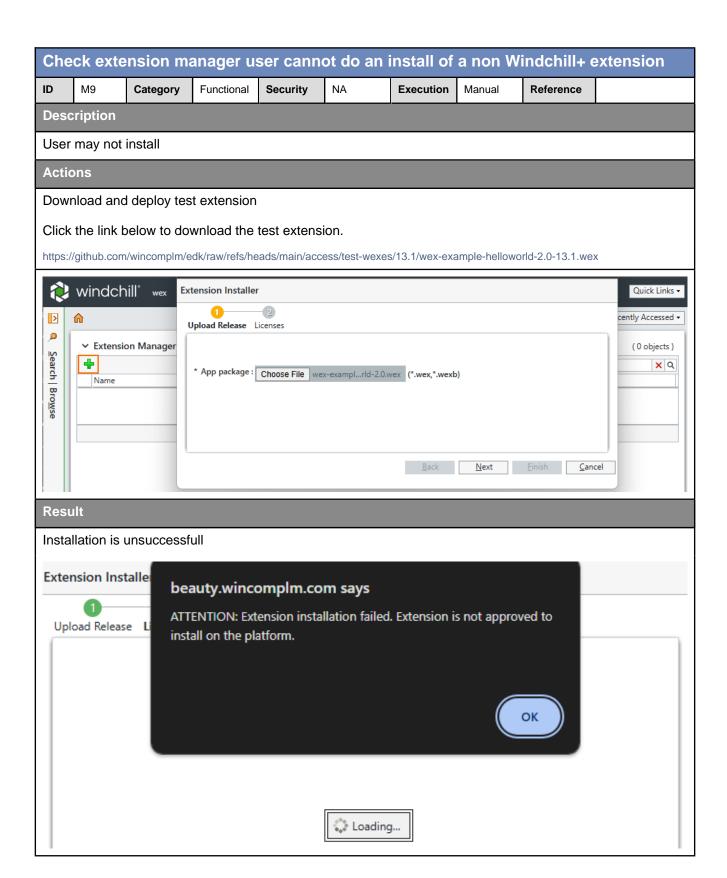

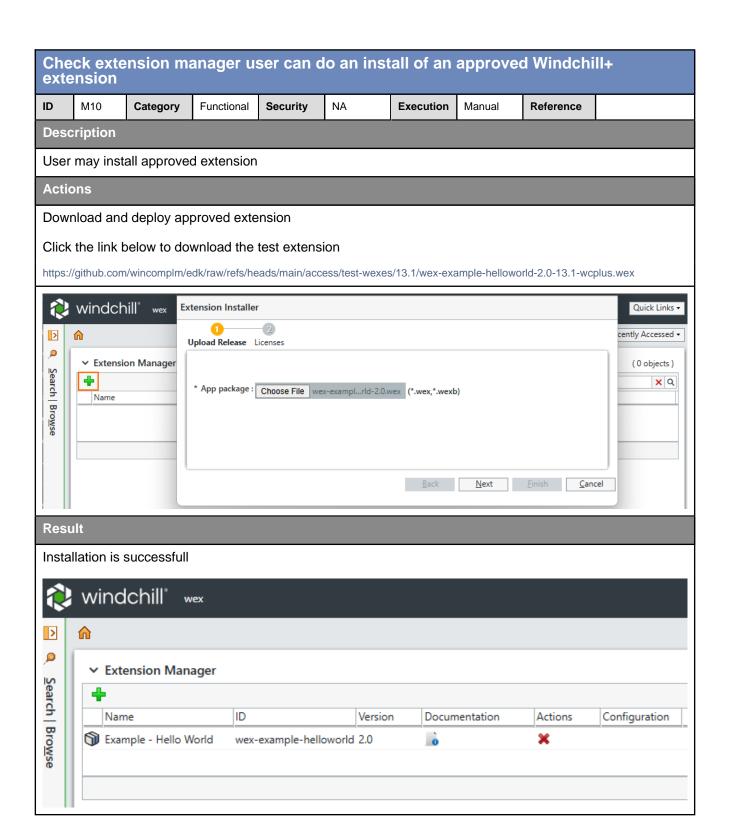

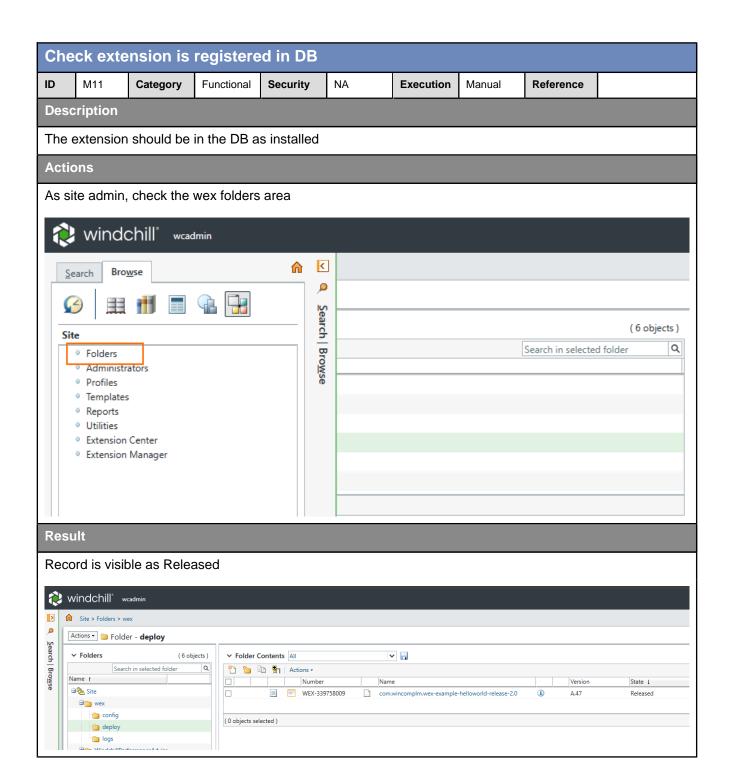

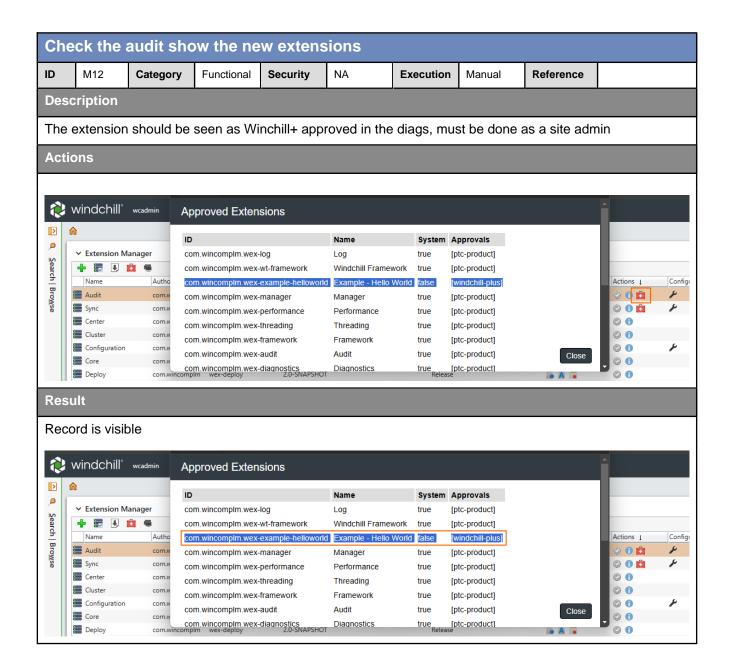

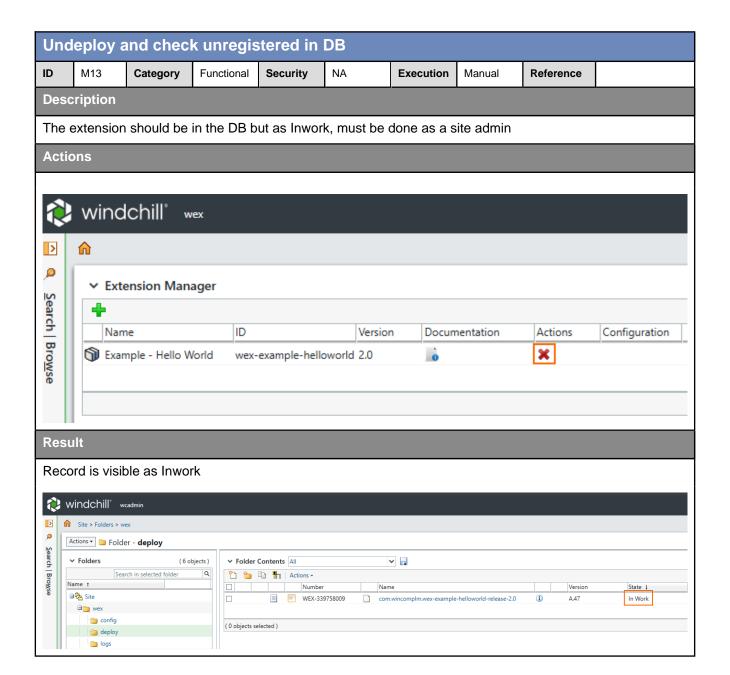

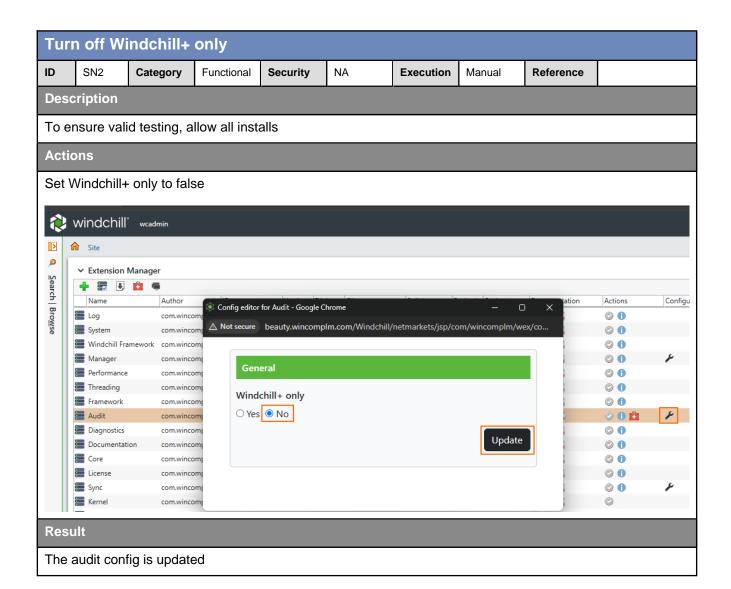

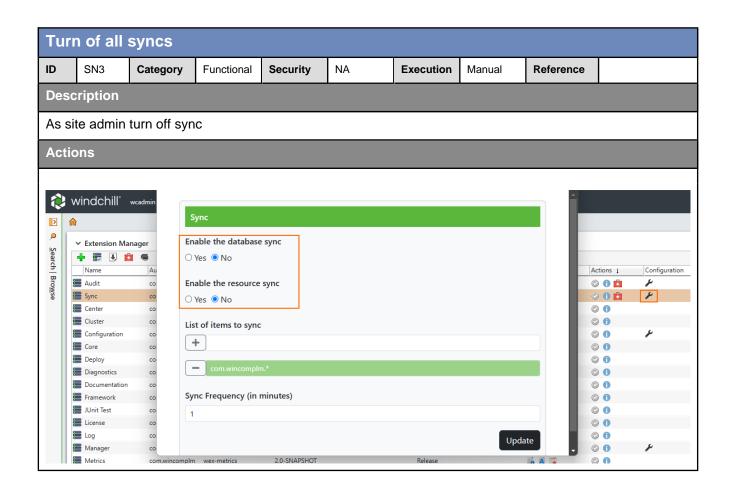

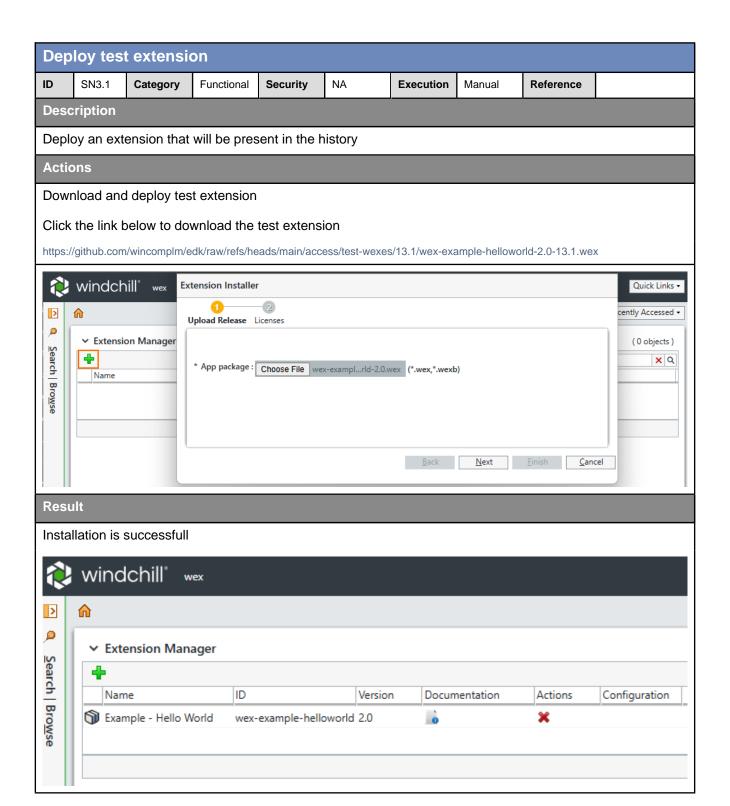

Sync SN1 Security Category Functional NA Execution Manual Reference Description Testing the way the platform syncs to the DB and new updates. All testing must be done as Site Admin. Sync

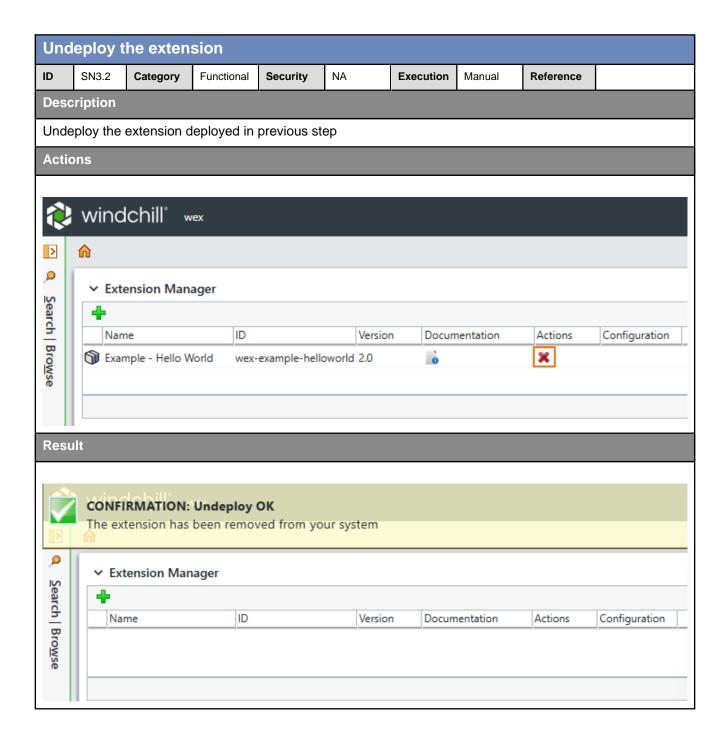

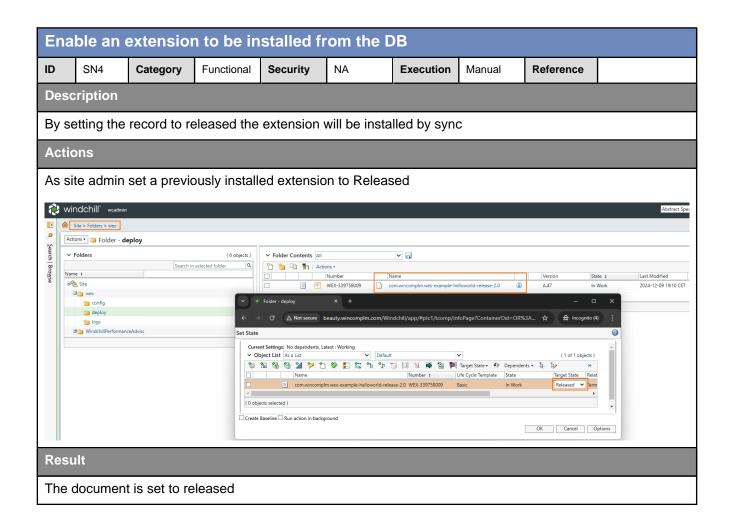

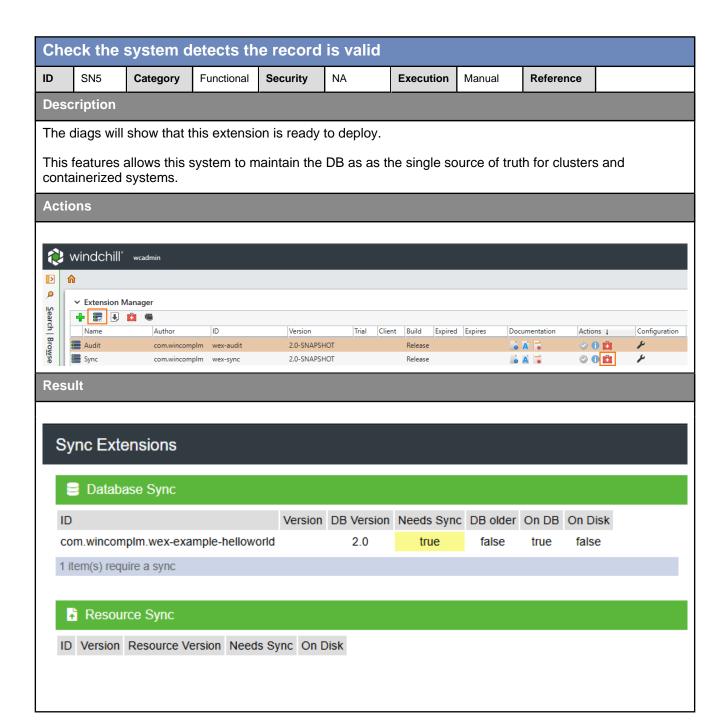

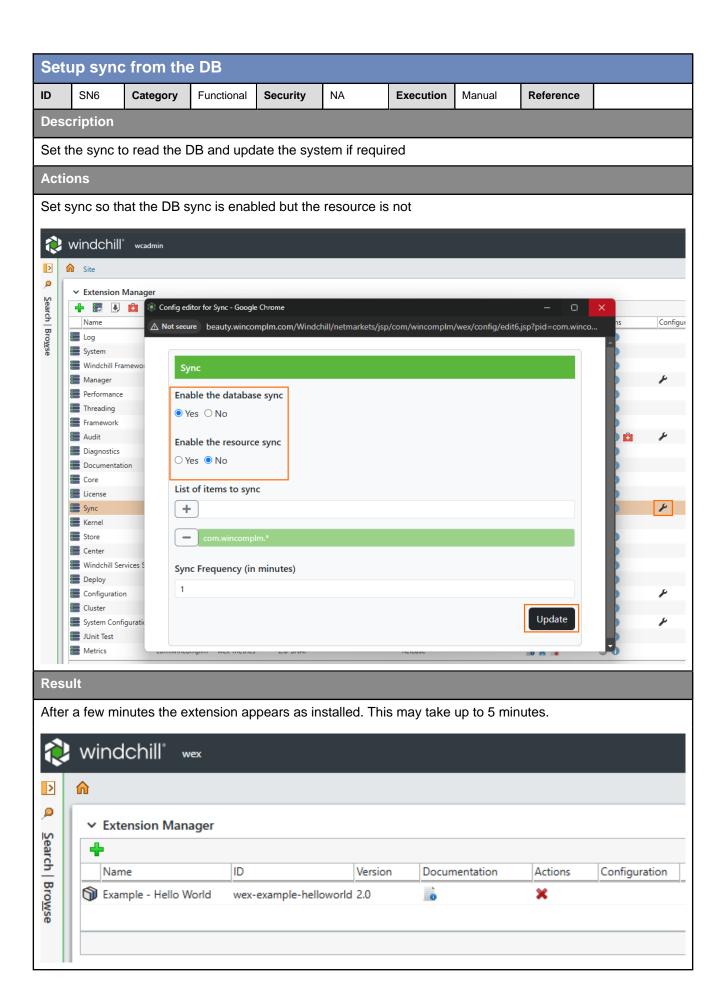

30

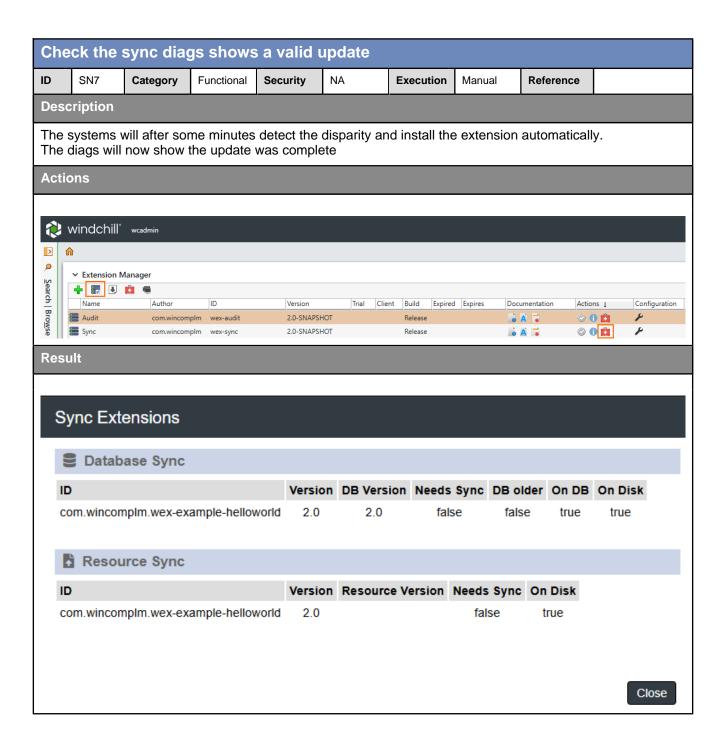

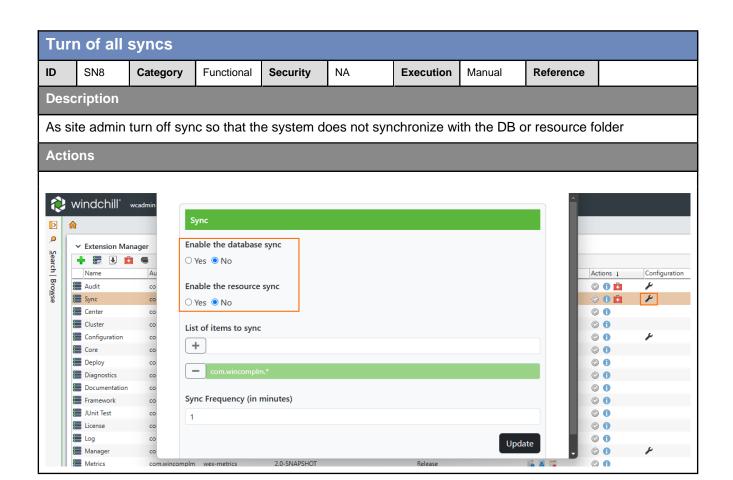

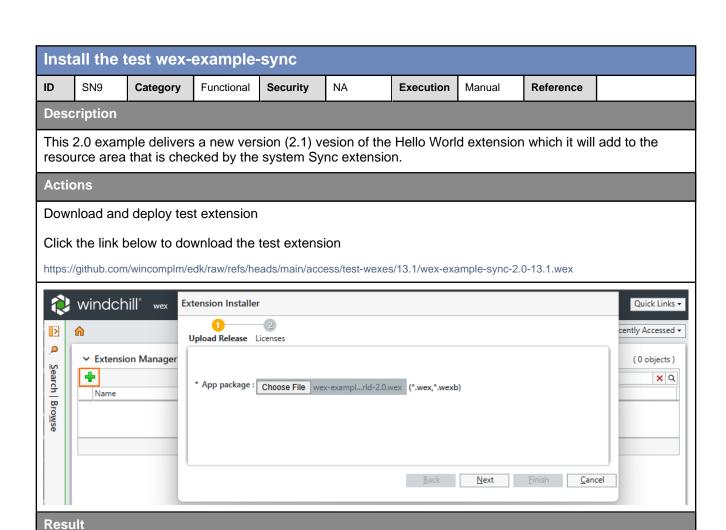

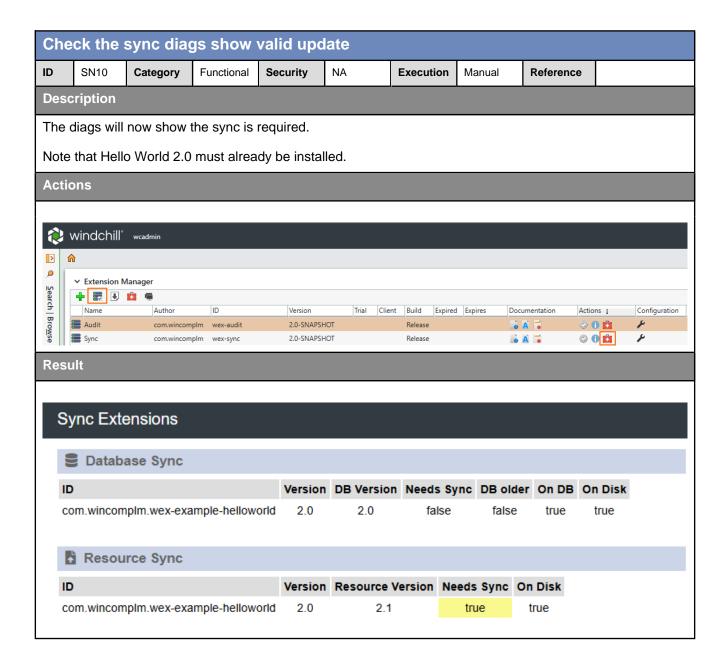

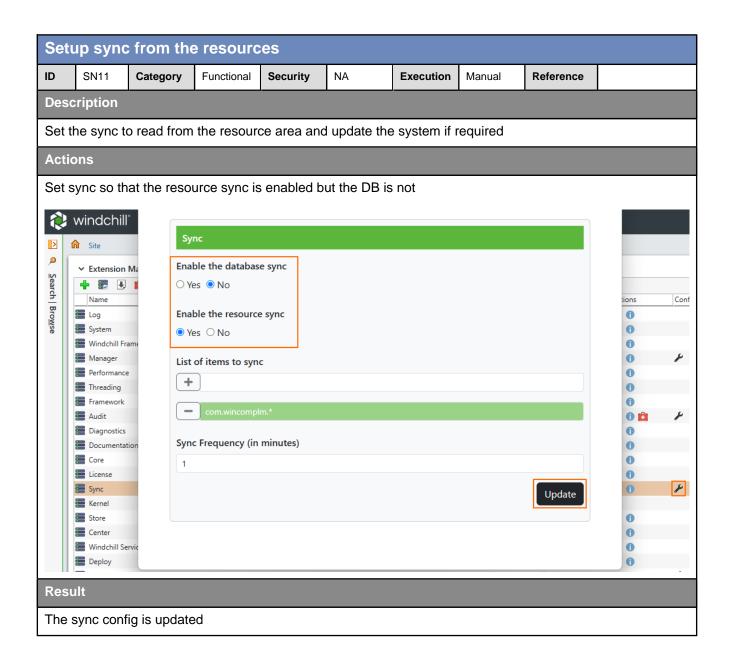

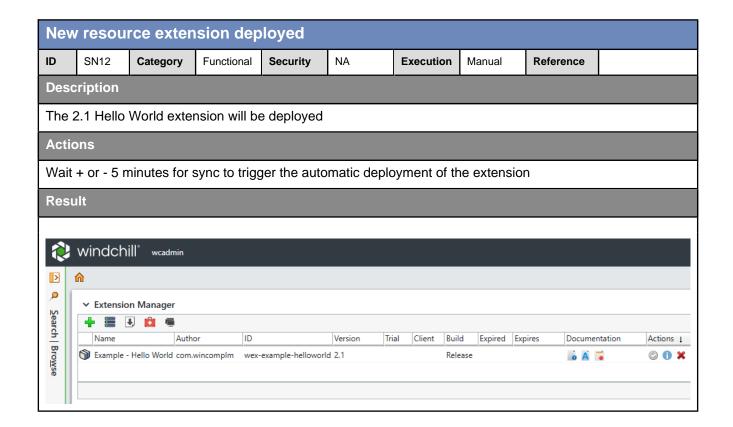

Extension deployed

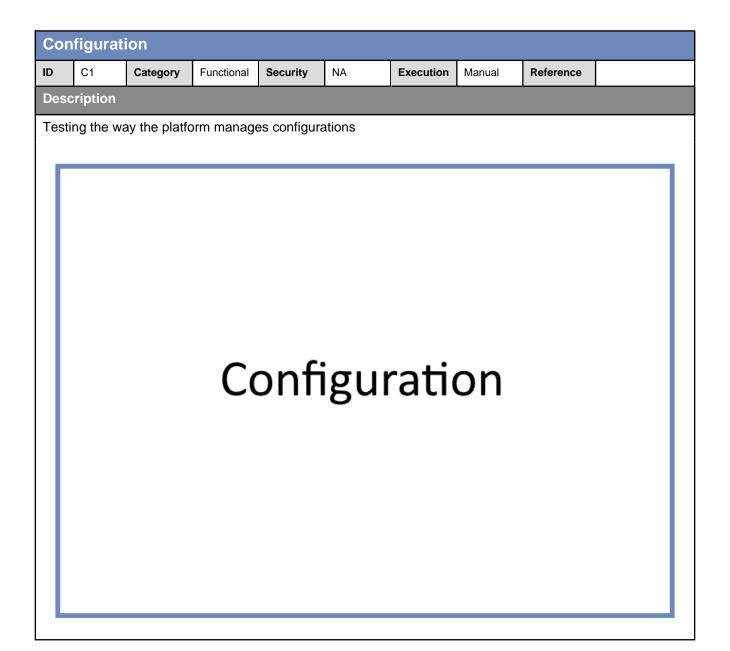

Turn off Resource Sync										
ID	SN13	Category	Functional	Security	NA	Execution	Manual	Reference		
Description										
Turn off the Sync that reads from resource area										
Actions										
Set the sync so that the resource sync is disabled and the DB is also disabled										
Result										
The sync config is updated										

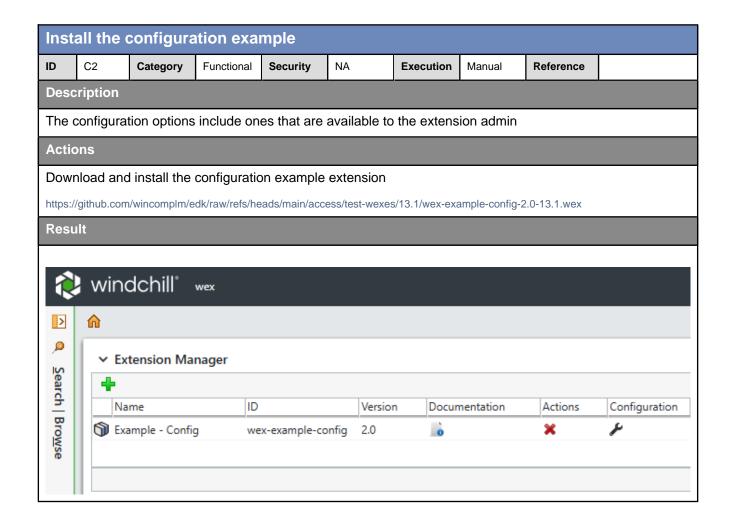

Undeploy all test Extensions										
ID	SN14	Category	Functional	Security	NA	Execution	Manual	Reference		
Description										
Ensuring that all extensions used for Sync testing are removed										
Actions										
Undeploy Hello World Example and Sync Example										
Result										
Extensions are undeployed										

## Check the security report of the example shows the correct information

ID C3 Category Functional Security NA Execution Manual Reference

## Description

The security reports will show which options are made visible to the Extension Admins

### Actions

No action, this is for information only

Result

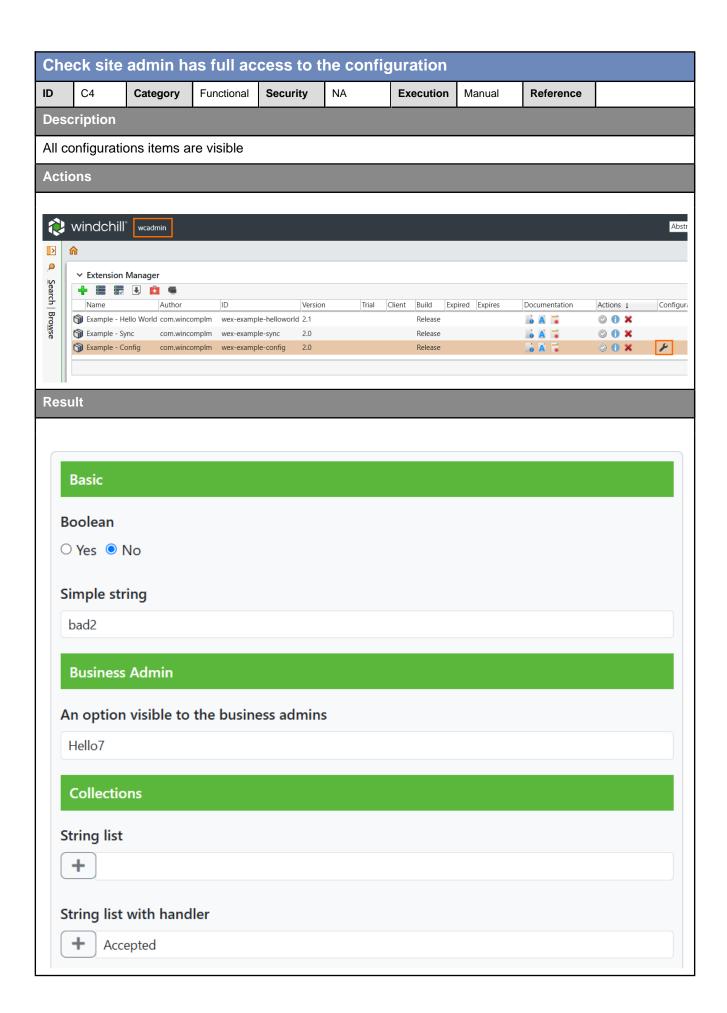

# Configuration

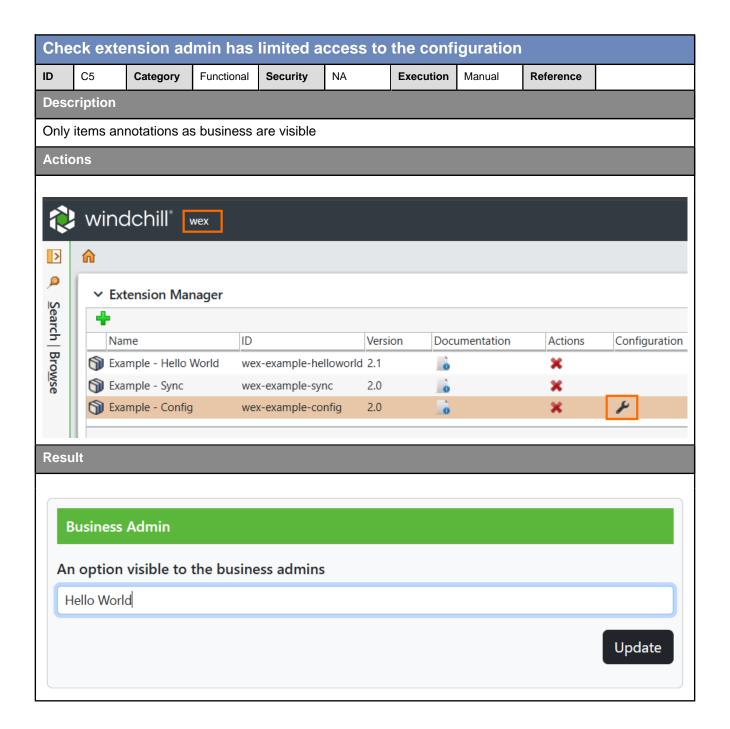

The configuration options for both Site Admin and Extension Business Configuration

Business Manager Options								
Category	Name	Туре	Description	Required				
Business Admin	businessString	String	An option visible to the business admins	false				

Admin Options								
Category	Name	Туре	Description	Required				
Basic	exampleString	String	Simple string	false				
Basic	exampleBoolean	boolean	Boolean	false				
Collections	exampleList	List	String list	false				
Collections	exampleMap	Мар	String map	false				
Collections	exampleStateList	List	String list with handler	false				
Security	examplePassword	String	Password	false				

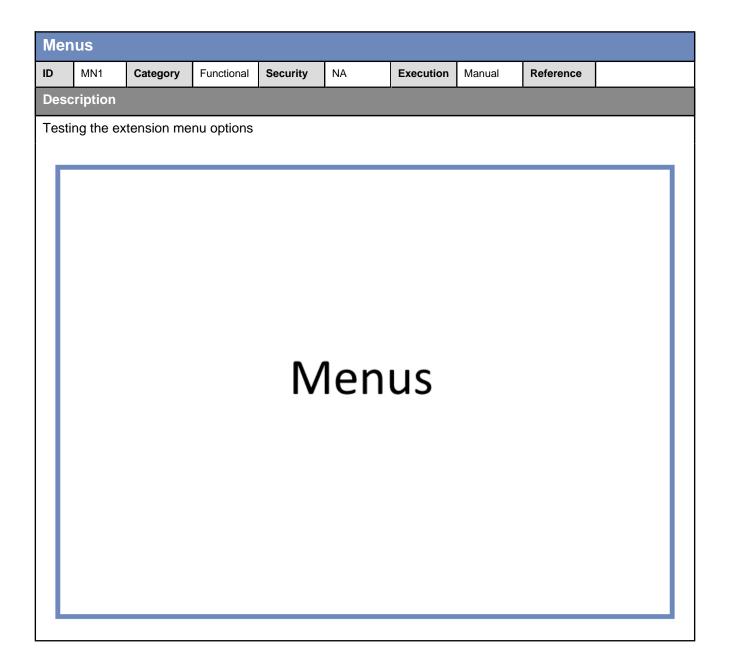

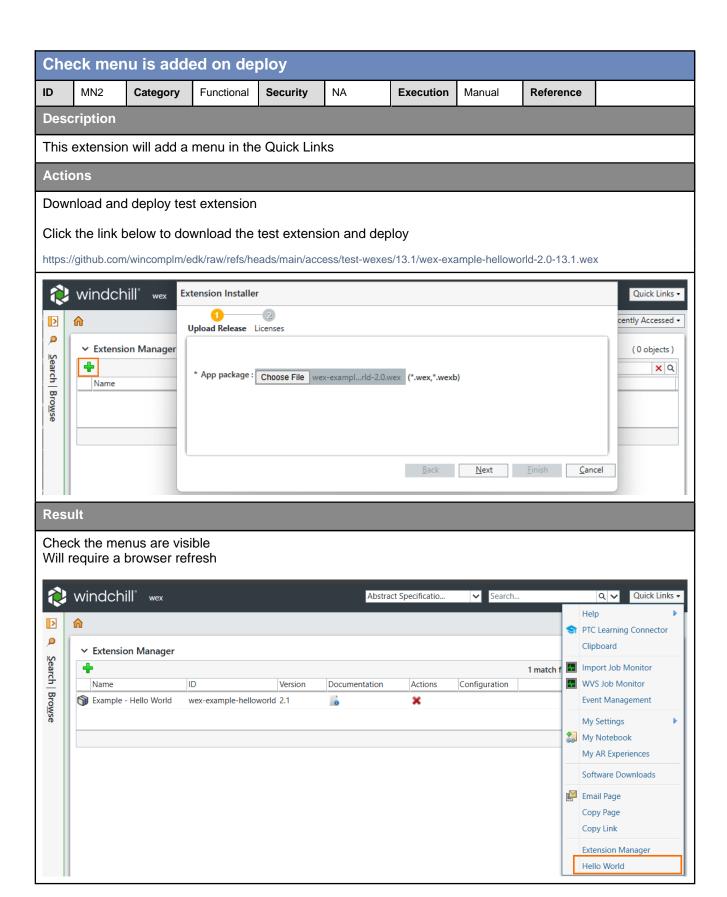

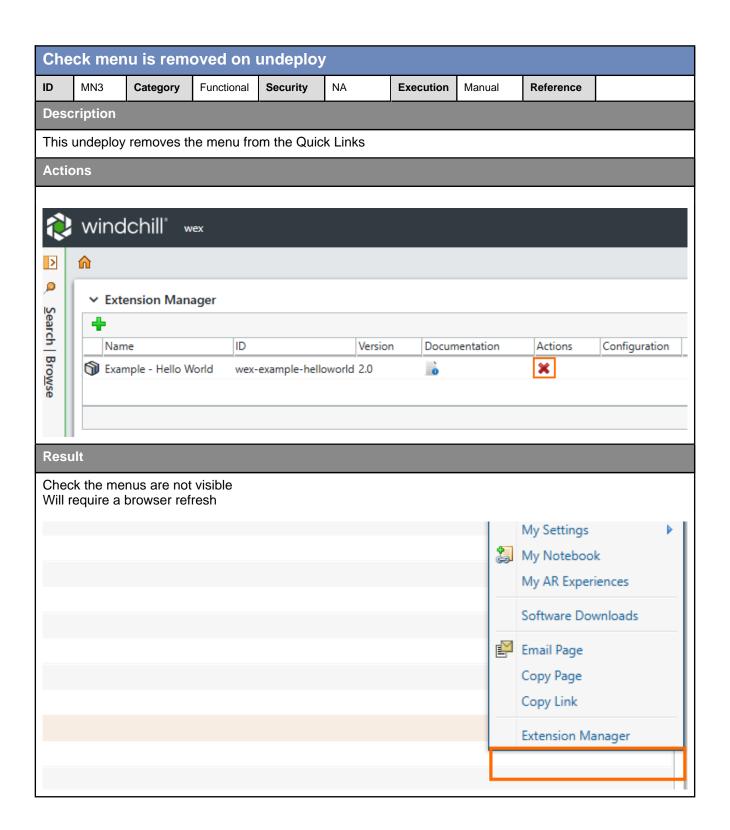

Check configuration can be changed										
ID	C6	Category	Functional	Security	NA	Execution	Manual	Reference		
Description										
Ensure configuration is updated for an Extension										
Actions										
Show System Extensions, go to Audit and change the configurationAfter updating check Method Server for any errors										
Result										
Configuration for Audit should be changed and saved										

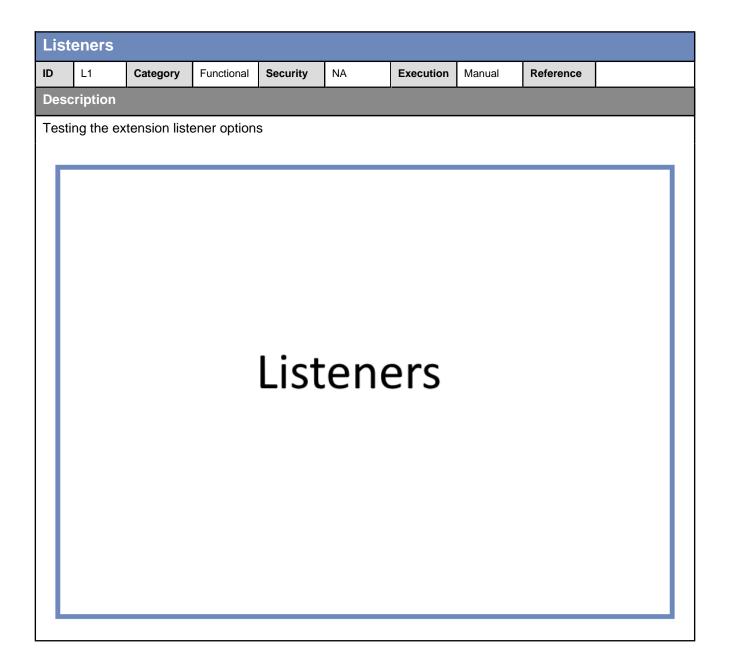

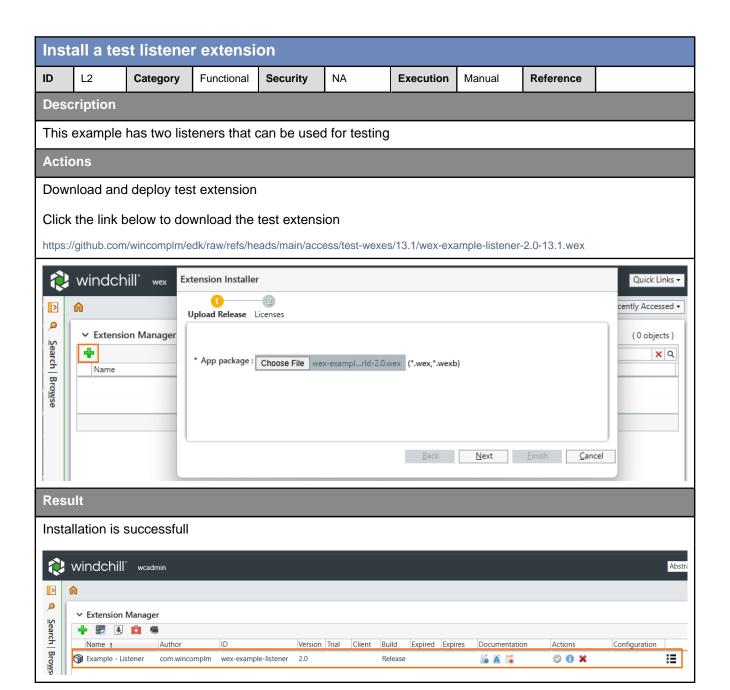

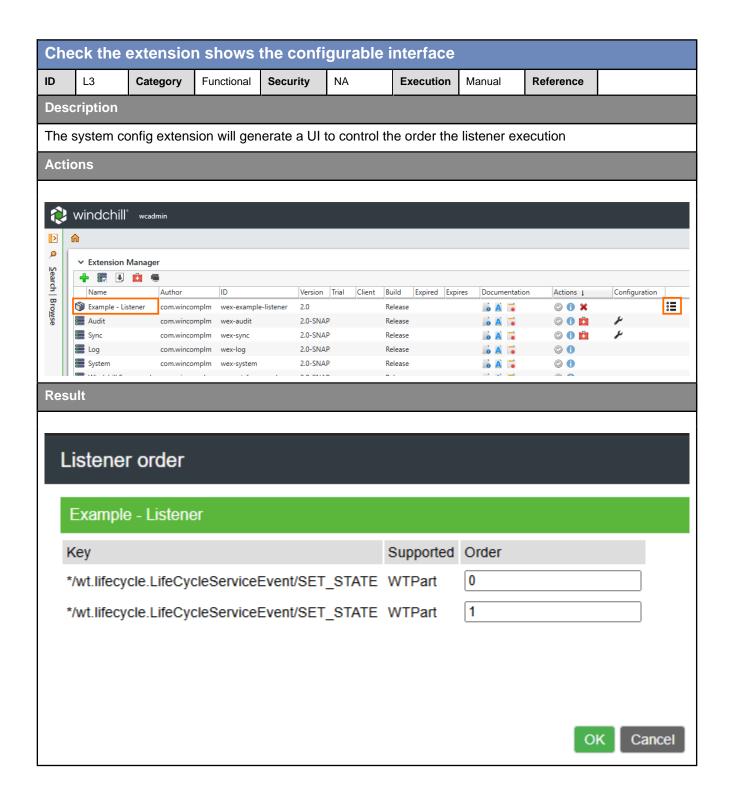

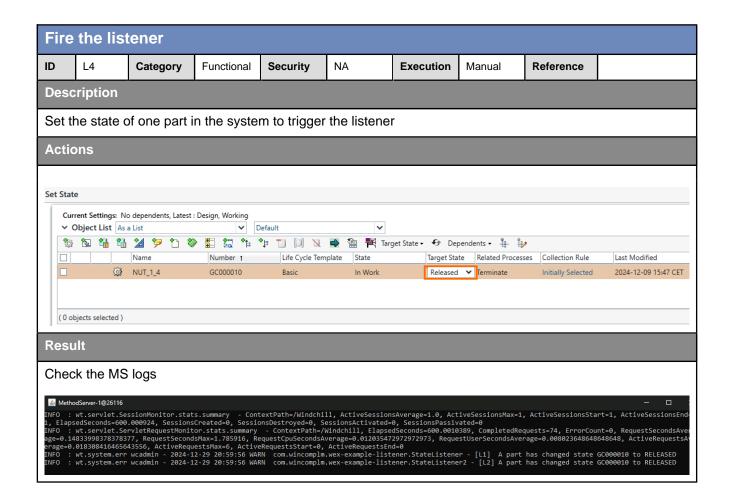

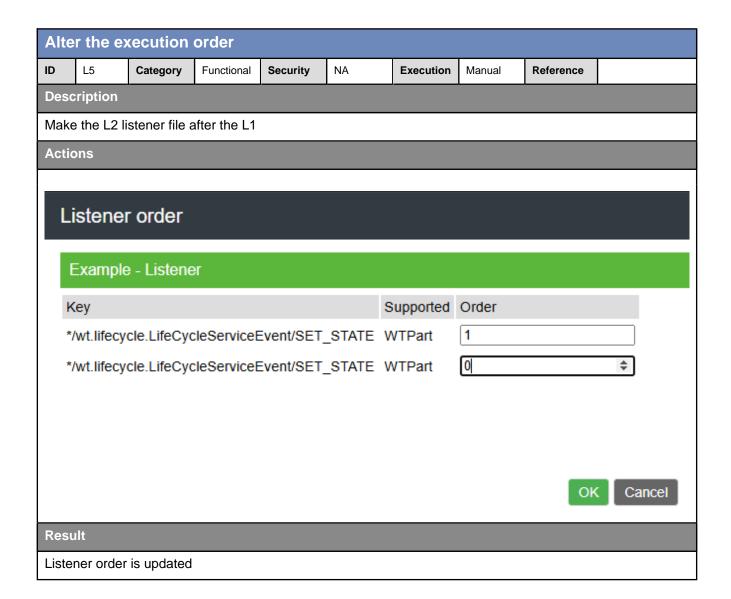

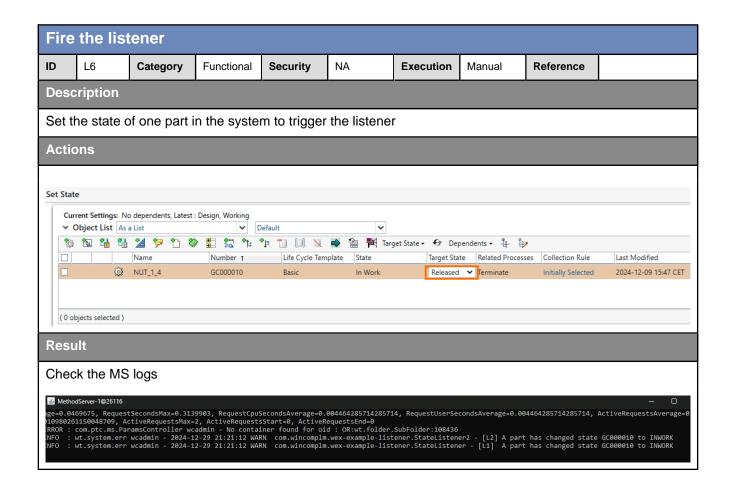

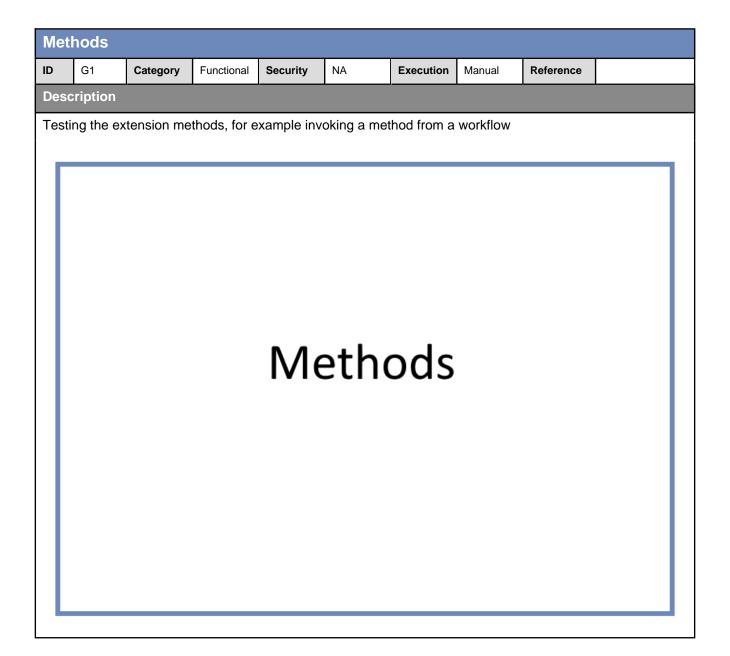

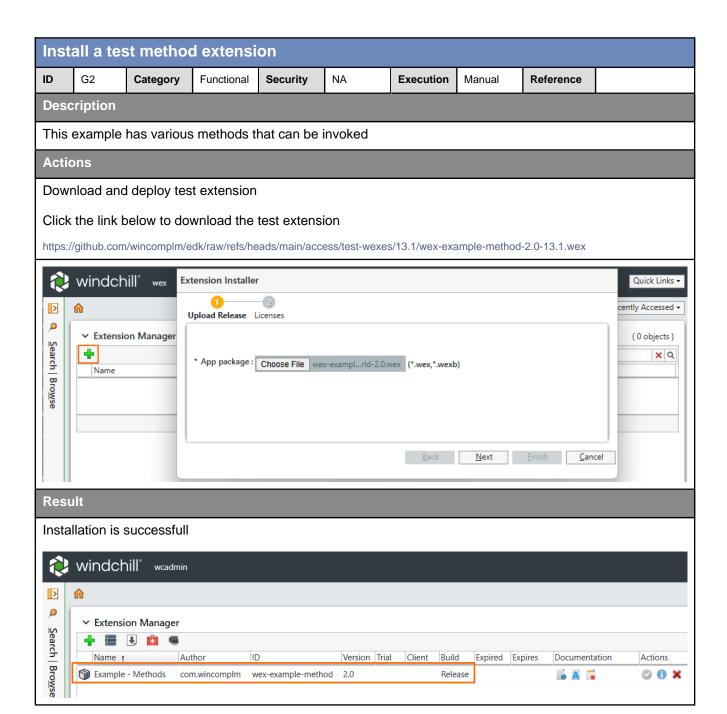

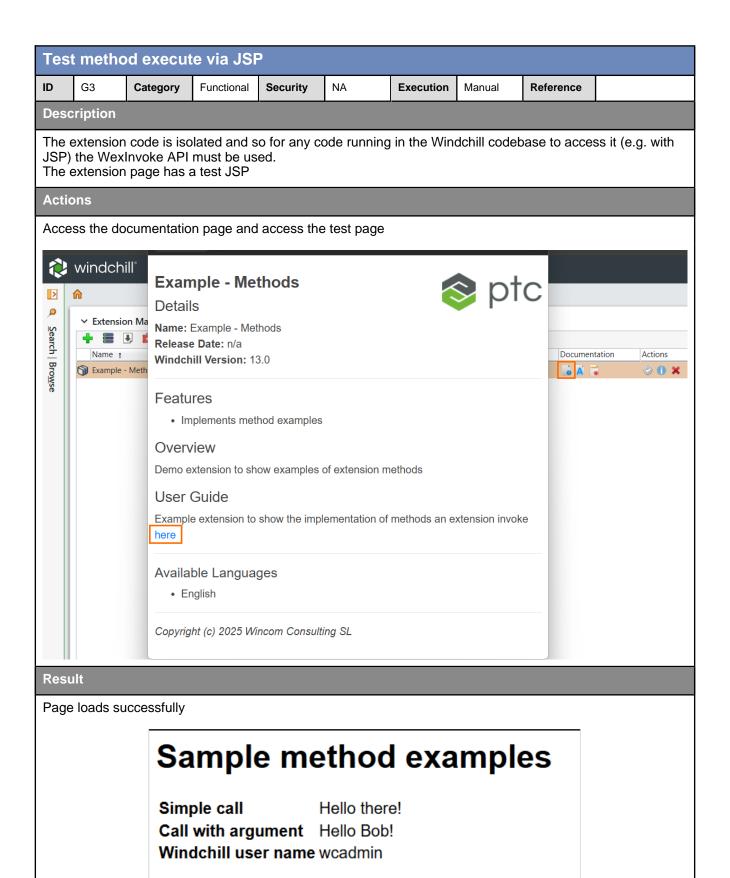

#### Create a workflow to execute a WexInvoke G4 Category Functional NA Security Execution Manual Reference **Description** Like a JSP the workflow code runs in the Windchill codebase and the wex code is hidden and must be accessed by an invoke **Actions** Create the new workflow as site admin using the Workflow Templates from the site. The execution robot should have the following code String wexresult = com.wincomplm.wex.kernel.api.invoke.WexInvoker.invoke("com.wincomplm.wexexample-method", "methods.argName", "Hello Wex"); System.out.println("The wex returned " + wexresult); windchill\* wcadmin Abstract Specificatio... > Site Type and Attribute Management Manage type definitions, attribute definitions, measurement systems, and qua Search permissions can create, modify, or remove types or attributes. Additionally, us attribute definitions with type definitions, and constrain the values of those at **Text Tailoring** Customize the text in the user interface, such as string messages, buttons, and Browse View Administration Create and manage a network of available product structure views. Visualization Configuration Administration Manage WVS configurations including Creo View preferences, watermarks, pr **Workflow Template Administration** Create and manage workflow templates used for automating processes, in wh participants, within the context of specific business objects. Search for workflow processes and view activity and task level details. Restart Workflow Process Administration **WVS Job Monitor** View the status of WVS Jobs. WVS Job Scheduler Administration Create and execute WVS jobs. Result
